Swedish design since 1883.

Timeless design has made our tools into icons.

10 000 times. That's how many times you can fold a Hultafors folding rule. No other folding rule can do that. Ever since we invented it we have aimed to make the workday better and more efficient for our user's.

This year we are celebrating an incredible 325 years at our forge Hults Bruk. We are also soon marking 140 years in the business of developing innovative tools for professionals. And as you know by now, it all started with the folding rule.

Hultafors offer a wide selection of hand tools for all types of professional craftsmanship. That's why we develop our tools in a close cooperation with our users. Our tools should have the best possible functionality, quality and precision so that our users can focus on their job.

We are proud of our design philosophy – where form follows function. Our tools are made in a timeless design, which have made them into icons. They have become must haves for countless craftsmen. This shows that hand tools are here to stay even in the times of power tools. If you ask a professional, they will answer it has to be Hultafors, if you want tools that you can trust.

Swedish design since 1883.

THE CRAFTSMAN'S BEST FRIEND.

The red ends, the blond downy birch and the characteristic smoothness of the joints. Originating from 1883, our classic folding rule has long since reached legendary status. We are continuously developing new versions of the original and you can find folding rules in wood, fibreglass and aluminium. All with the ambition to be the craftsman's best friend for a long time.

FOLDING RULE 59-2-10

Choose the right material.

FIBREGLASS, BIRCH OR ALUMINIUM.

Our classic folding rules are made from downy birch. However, we also produce rules in fibreglass-reinforced polyamide and anodized aluminium, allowing you to choose the material that is the best fit for your job. The aluminium folding rule is appreciated by users working close to heat, for example when welding. The fibreglass rule is unaffected by water and therefore a good choice for craftsmen doing masonry, or working with paint and plaster.

Accurate measurement.

MANUFACTURED TO STRINGENT REQUIREMENTS.

All our folding rules are calibrated to the very highest levels of accuracy and are compliant with EU requirements for Class III. This means that a 2 metre long folding rule has a maximum deviation of ± 1.4 mm and a 1 m folding rule a deviation of ± 1 mm. The measurement over an articulated joint has a deviation of no more than ± 0.5 mm. But we don't stop there. Our manufactory process is governed by a quality system certified in accordance with ISO 9001.

7

Folding Rule 59

A Hultafors classic – a must for every craftsman. Traditionally manufactured from downy birch with Swedish steel joints, affording thin sections and great flexibility. Metric scale in black on both sides, and red decimetre figures.

- Type approved as per EU Class III.
- Coated with a water-based protective lacquer for increased resistance to dirt and moisture.
- The joints are heat-treated, coated and oiled at three points to ensure first-class performance.
- Each folding rule section is checked twice during the production process using high-speed cameras.

Folding Rule 59-2.4-12

Hultafors' original is now available in a longer version! Same high quality and features but in a 2.4m version, adapted to current building standards. traditionally manufactured in our factory in Sweden. Made from hand picked birch wood and high quality hinges made from Swedish steel in combination with the red ends according to Hultafors characteristics. This new model has inherited the techniques from our ongoing development work (starting in 1883) in order to secure precision (EU Class III & CE marking), thin sections, high readability, maximised durability and the right feeling. Metric scale in black on both sides of the section in combination with highlighted red 10 cm grading for high readability. Each section is checked with a high speed camera twice in production to secure the accuracy.

- EU Class III.
- 2.4 m length.
- Water based protective coating.
- Hultafors high quality hinges.
- FSC[®]-certified.

Folding Rule G59 2.4

240 cm long ruler made of fibreglass reinforced polyamide, which makes it resistant to moisture. Which makes it durable with a long service life. With an extra length of 40 cm, it is adapted to measure, for example, plasterboard, ceiling height and doors without having to move the folding rule to complete the measurement. Metric gradation with centimeters/millimeters in black on both sides and red decimeter markings for easy reading.

- 2.4 m long reaches further.
 - All joints locks in steps of 90 °.
 - Moist resistant.
 - Foil-embossed scale provides increased protection against wear.
 - EU Class III precision class.

Folding Rule G559 Contact

Our Contact-Meter is made of fibreglass reinforced polyamide, which makes it resistant to moisture and wetness. Making it highly durable and with a long service life. The Contact-Meter facilitates especially shorter measurements as the metric scale starts on the inside of the first stick. Which means that the part of the folding rule that is folded then ends up on top of the stick and not below as with a regular folding rule. Metric gradation with centimeters / millimeters on both sides and red decimeter markings.

- · Lies flat against the work surface.
- All joints locks in steps of 90 °.
- Moist resistant.
- Foil-embossed scale provides increased protection against wear.
- EU Class III precision class.

Tape measures with precision.

MAKE SURE YOU GET IT RIGHT THE FIRST TIME.

The most important consideration when choosing a tape measure is precision. High precision tools reduce the risk of errors. Hultafors steel tape measures offer the highest precision on the market – EU Class 1. The majority of our measuring tapes are graduated using inkjet technology to achieve the high level of precision. Our range includes both short and long tape measures in several materials, reaching from 3 metres to 100 metres.

EU class I and II.

TAPE MEASUREMENT ACCURACY.

Measurement accuracy is a very important feature of a tape measure. It is measured and stated in the form of a tolerance class. In Europe, we normally classify measuring tapes in EU Class I and EU Class II. The accuracy is measured at 20 °C and 50 N pull force for steel tape and 20 °C and 20 N pull force for fibreglass tape. See table next page.

Seasonal adaptation.

TEMPERATURE AFFECTS THE LENGTH.

Major temperature changes can have a significant effect on the length of a steel tape measure. The tolerance for our tape measures apply at 20 °C. We often experience significant temperature differences between summer and winter. That is why it is important to be aware of the measurement deviations for various temperatures. See table next page.

Tape measurement accuracy - EU class I and II.

The accuracy is measured at 20°C and 50 N pull force for steel tape and 20°C and 20 N pullforce for fibreglass tape.

STEEL TAPE MEASURE PRODUCTION TOLERANCES

Total length (m)	Class I (mm)	Class II (mm)
2	±0.3	±0.7
3	±0.4	±0.9
5	±0.6	±1.3
8	±0.9	±1.9
10	±1.1	±2.3
15	±1.6	±3.3
20	±2.1	±4.3
25	±2.6	±5.3
30	±3.1	±6.3
50	±5.1	±10.3
100	±10.1	±20.3

LENGTH CHANGE FOR A STEEL TAPE MEASURE FOR TEMPERATURE **DEVIATIONS FROM 20°C**

ΔΤ	10°C	20°C	30°C
Length (m)		Length change (±mm)	
2	0.2	0.5	0.7
3	0.4	0.7	1.1
5	0.6	1.2	1.9
8	1.0	2.0	3.0
10	1.2	2.5	3.7
20	2.5	5.0	7.4
30	3.7	7.4	11.2
50	6.2	12.4	18.6
100	12.4	24.8	37.2

Length change ΔL is calculated using the formula ΔL = L x ΔT x α L = tape measure length, ΔT = temperature difference from 20°C.

α = length enlargement coefficient (1.24 x 10-5).

Example: fourdoor temperature is -10°C, the difference will be -30°C and so, for an 8 m long steel tape measure, the change in length will be -3.0 mm.

Offset for measurements (including end hook): Class I: 0.1 mm, Class II: 0.2 mm.

Short Tape Steel PR

Tough tape with ergonomic grip, rubber coated button and brake pad area, with a high impact case made of ABS plastic. Yellow, wear resistant blade graduated using highly accurate inkjet print. Smooth blade return action and bump stop with anti-wear function.

- Type approved as per EU Class I.
- Metal hole hanger for strap enabling safe work at heights.
- Strong stainless steel end-hook with reinforcement plate.
- Distinct brake causing no blade movement.
- The blade can be replaced and is available as a spare.

Short Tape Stainless Steel PRSS

The tape is graduated using highly accurate inkjet printing to give you optimal contrast and precision when measuring. The casing is made from high impact ABS plastics, rubber-coated for a better grip and impact resistance. It has an ergonomic grip and a rubber-coated brake button. It comes with a smooth blade return action and bump-stop with an anti-wear function that protects the blade and end-hook. The 4 meter model has a slim metal belt clip. The 6 meter model has a detachable belt clip with a quick-release function that makes it easier to release the tape with one hand. The end hook adjusts itself for internal measuring.

- Stainless-steel tape and spring.
- Type approved according to EU Class I.
- Metal clip for attaching a lanyard when working at heights.
- Strong stainless-steel end-hook with a reinforcement plate.
- Distinct brake that doesn't allow any blade movement.

Long tape measures

- A. Type A start. The scale starts 100 mm in from the outer edge of the end hook. Used primarily on long tape measures that can measure longer distances and normally require two people to operate. Available on PL, PC and TR tape models.
- **B. Type B start.** The scale starts where the hook attaches to the tape. Ideally suited for solo measurement applications. Available on CC, CC F and SY models.
- **C. Type C start.** The scale starts at the outer edge of the end hook. Ideally suited for solo measurement applications. Available on model PL, YL and PC tapes.

Short tape measures

D. The scale starts immediately at the end fitting. Ideally suited for both internal and external measurement. Available on model BT, PR and SL tapes.

Bench Tape Steel TRB

This tape measure is designed to be fitted to cutting benches. It is produced in corrosion protected steel, graduated in millimetres and has a blade width of 13 mm. Available with scale running right to left or left to right.

- The scale is protected by a nylon coating, making the tape particularly wear-resistant.
- The tape is protected against corrosion and can withstand contact with the majority of chemicals and solvents.

Taking measuring further.

MEASURING & MARKING MADE EASY.

The unique marking measures from Hultafors have facilitated work for craftsmen for decades. What makes the Talmeter marking measure so special is the fact that you can take a measurement and then mark it directly onto your workpiece. Without even reading off the scale to verify the length.

MARKING MEASURE TALMETER

The Talmeter is used when measuring and marking lengths and for etching arcs.

Simple measuring.

FOR BOTH INTERNAL AND EXTERNAL MEASUREMENTS.

Thanks to the combined measuring and marking edges and a firm brake you can keep your set measurement and securely transfer it to any object. Over and over again. Furthermore, it is equally simple to take both internal and external measurements, trace arcs and – depending on model – even diameters and circumferences. So go ahead and explore the possibilities. Take your measuring further with a Talmeter marking measure from Hultafors.

The perfect combination.

MARKING AND MEASURING WITH ACCURACY.

With a Talmeter, you don't have to convert the measurement you have taken to measurement units. Instead, it's simply a matter of aligning the marking and measurement edges between the measurement points of the object being measured. The scale is automatically locked at this length and, using the same measurement and marking edges, you then etch the exact length on the workpiece. This can be done one or more times without any changes in accuracy.

Marking Measure Talmeter 2M/3M

White, impact resistant steel tape measure, 16 mm blade width, graduated in millimetres with an ABS plastic case. Combined marking and measurement edges mean that you can quickly and simply measure and mark both internal and external lengths. The tape and extender can be replaced and are available as spare parts.

- Internal and external measurement using etching function.
- Diameter measurement with scale on the reverse side of the tape.
- The Talmeter has a calliper function that is handy to mark out round shapes.
- The scale is always locked in normal position.
- The extender is easy to extend and retract using the grip-friendly sliding carriage.

Marking Measure Talmeter 6M

White, impact resistant steel tape measure, 25 mm blade width, graduated in millimetres using inkjet technology with an ABS plastic case. Combined marking and measurement edges mean that you can quickly and simply measure and mark both internal and external lengths. The tape and extender can be replaced and are available as spare parts.

- Internal and external measurement using etching function.
 - Unique belt clip with a quick release function that allows the marking measure to be released with one hand.
- Vertical scale on the reverse side of the tape.
- The Talmeter has a caliper function that is handy to mark out round shapes.
- The extender is easy to extend and retract using the grip-friendly sliding carriage

Marking Measure Talmeter 3M VP

A marking measure for craftsmen working on hot surfaces or with ventilation pipes, requesting the mm and diameter scale to be on the same front side of the blade. White, impact resistant steel tape measure, 16 mm blade width, graduated in millimetres, with an ABS plastic case. Combined marking and measurement edges mean that you can quickly and simply measure and mark both internal and external lengths. The tape and extender can be replaced and are available as spare parts.

- Diameter measurement with scale on the front side of the blade above the millimetre scale.
- The Talmeter has a calliper function which is useful when marking round shapes.
- The scale is always locked in normal position.
- The extender is easy to open out and retract using the grip-friendly sliding carriage.

Robust and versatile tool.

HIGH PRECISION AND MULTIFUNCTIONAL.

Hultafors introduces the rafter square, an interesting tool with many different functions. It especially comes into its own when building stairs and rafters. Then it is perfect to have on hand to quickly and easily mark out angles. Despite this, many craftsmen have never used the tool. We want to change that.

METRIC RAFTER SQUARE

The rafter square is used to mark 45 and 90 degree markings quickly and accurately.

A versatile tool.

USE FOR MARKING AND SAW GUIDE.

Thanks to the strong edge, the rafter square can be used as a guide when sawing, for both cross sections and angled sections. The tool is also provided with scales for cutting rafters while the grooves in the triangle act as support when marking out, for example, longitudinal lines or when cutting plasterboard to size.

The perfect combination.

MARKING AND MEASURING WITH ACCURACY.

The rafter square is a robust and versatile tool. It is made of solid aluminium and has CNC-machined edges for optimum precision and high wear resistance. The gradations are laser etched and resist wear and provide optimal readability. The square has an anodised, protective and low reflective surface. It also has scales on the inside that act as support when marking our longitudinal lines or when cutting plasterboard to size.

Rafter Square

The Rafter Square is a robust and versatile tool for all craftsmen. It features a solid aluminium body with CNC-machined edges for greater accuracy and durability. The tool allows you to make fast and precise 45° and 90° markings. In addition, its thick edge is useful as a saw guide – it can be used directly with the saw against the square for cross cuts or angled cuts. This highly versatile tool can be used indirectly as well, using the scribing notches to create a pencil line or for when cutting plaster with a knife. The Hultafors Rafter Square can also be used as a protractor, for easily finding and marking various common angles. The tool has scales for cutting hip, valley and jack rafters.

- Solid aluminium body with CNC-machined edges for greater accuracy and durability.
- Low-glare protective anodized finish.
- · Graduations are laser etched, highly resistant to wear and numbers are highly visible.
- Scribing notches.
- Thick edge is useful as a saw guide.

NEW 2023

Adjustable Square Quattro

A patented square with a blade that can be rotated to 45° , 90° and 135° . It can also be rotated 270 degrees allowing you to use the opposite side of the stock where there is no slit that for example thin sheet metal parts can slide into. In addition, there are markings for 22.5°, 67.5° and $75^{\circ}/15^{\circ}$. The square is also completely foldable, which makes it easy to store and carry in the pocket of your work trousers. The blade is 45 mm wide to accommodate work with standard stud dimensions and has a center line that makes it easy to quickly mark out both sides of a stud. The blade also has scribing notches, spaced 5 mm apart, which can be used to draw or cut a line parallel along an edge. The square has a sharp outer corner, which other adjustable squares do not have. If you rotate the blade 270° you get a rounded corner instead so you can work in uneven corners. A robust joint and a blade of 1 mm thick, high-strength stainless steel provides a very durable design that can withstand tough working environments and will lasts a long time. Carefully selected materials and manufacturing techniques such as a CNC-milled stock and a blade cut with a precision laser provide high accuracy; angle tolerance $\pm 0.06^{\circ}$ (± 1 mm/m).

- Adjustable with fixed positions for 45°, 90°, 135°, 180° 225° and 270°.
- Laser etched millimeter graduation with very high contrast and abrasion resistance.
- The stock is made of fully anodized aluminum with a 19 mm thick handle.
- High strength stainless steel blade 45 mm wide, 1 mm thick.
- Made in Europe with full control over working conditions and sustainability.

When precision matters.

OUR STRONGEST AND MOST SENSITIVE SPIRIT LEVEL.

MST is available in two lengths. The MST 75 comes with two vials and the MST 180 has three. For professional craftsmen, a good spirit level is essential for a job well done. Our spirit levels are equipped with hard plastic vials that have a high degree of transparency and durability. The vial fluid is a low viscosity oil mixture that is resistant to temperature fluctuations, ultraviolet light and static electricity. To guarantee precision, all of our spirit levels are manufactured in accordance with a quality system that meets ISO 9001.

SPIRIT LEVEL ALUMINIUM MST

The right sensitivity.

DEPENDING ON THE TASK.

Make sure you choose a spirit level with a sensitivity rate that suits your task at hand. 10 mm/m is the optimal rate for a allround spirit level. For more specific measurements we recommend a level with higher sensitivity. A perfect task for the MST.

Our spirit levels are robust, sensitive and durable. The range includes everything from long to mini spirit levels, magnetic to digital. What is the right one for you?

Spirit Level Aluminium PV

Extra strong aluminium profile measuring 59x26 mm and weighing 880 g/m. Transparent and durable Crush-proof block vials with temperature-proof vial mountings, highly resistant to ultraviolet light and temperature fluctuations. Horizontal vial with a +30% magnification lens and luminescent reflector.

• Tolerance in normal position is ±0.5 mm/m, upside down ±0.5 mm/m.

- The liquid in the vial is a low viscosity coloured oil mixture that gives the bubble optimal freedom of movement.
- The anti-static properties of the liquid means that the bubble is not affected by static electricity.

Spirit Level PVL 120

Limited edition of the popular PV. The integrated handles make utilising the spirit level even more efficient. Extra strong aluminium profile with reinforcing ribs for maximum stability. Crush-proof Focus vials with 60% magnification in three positions. Highly resistant to ultraviolet light and temperature fluctuations.

- Integrated handles with rubber grip.
- Tolerance in normal position is ±0.5 mm/m, upside down ±0.5 mm/m.
- Focus vial with colour markings for easy reading and with a 200 mm radius giving a sensitivity of 10 mm/m.
- The liquid in the vial is a low viscosity coloured oil mixture that gives the bubble optimal freedom of movement
- Shock absorbing end protectors with anti-slip function.

Spirit Level Aluminium MST

The MST level is our strongest and most sensitive spirit level. Crush-proof block vials that is UV-resistant and withstands temperature changes with a +30% magnification lens and luminescent reflector for easier reading. Made from strong aluminium profile measuring 100x25 mm weighing 1180 g/m that is easy to clean and equipped with ergonomic handles.

- The radius of the vial is 2000 mm, giving a sensitivity of 1 mm/m.
- Tolerance in normal position is ± 0.3 mm/m.
- Slots in the Aluminium profile makes it possible to fasten the level against the wall for easier mounting of example cabinets.
 The liquid in the vial is highly resistant to ultraviolet light and temperature fluctuations and gives the bubble optimal freedom of movement.
- · The anti-static properties of the liquid means that the bubble is not affected by static electricity.

Smart and compact multifunctional digital pocket level. This device combines the functions of a spirit level, an inclinometer and a protractor in one device. The auto-rotating, backlit display and v-grooved magnetic base allows for use in many environments. Switchable acoustic signal. Combine it with our Hultafors Measures app, to show the full potential of this small spirit level.

- Tolerance of 0.05° at 0° and 90°, 0.2° between 1° and 89°.
 Magnetic base with V-groove ensures a secure hold on pipes and metal surfaces
- Magnetic base with vertoove ensures a secure hold on pipes and metals
 Bluetooth interface for the Hultafors Measures app.
- Display measure values switchable between °, %, mm/m and in/ft.
- Included belt pouch for protection and transportation.

Mini Pocket Level

Hultafors MPL is a compact spirit level with a vial that has a magnifying effect for fast and reliable horizontal measuring.

MPL fits in any pocket, making it the perfect companion for everyday work. It features a crushproof, horizontal vial with a +30% magnifying effect and a luminescent reflector for better readability in dim light conditions. Made in polyamide and reinforced with fiberglass.

- Compact size.
- Suitable for horizontal measuring.
- Tolerance in normal position is 1.00 mm/m.
- Crush-proof block vial with magnifying effect.

Mini Pocket Level Magnetic

Hultafors MPL Magnetic is a compact spirit level with a magnet for fast and reliable horizontal and vertical measuring.

MPL Magnetic fits in any pocket, making it the perfect companion for everyday work. The strong magnet and V-groove facilitates measurement on flat or curved surfaces, such as pipes, beams etc. It features a crush-proof focus vial with a +30% magnifying effect and a luminescent reflector for faster and better readability in dim light conditions. Made in polyamide and reinforced with fiberglass.

- Compact size.
- Suitable for horizontal and vertical measuring.
- V-groove for measurement on flat or curved surfaces.
- Tolerance in normal position is 0.75 mm/m.
 Crush-proof focus vial with magnifying effect.
- ordan proor locas vial with magnifying enect.

Digital Spirit Level D

Spirit level with a digital unit mounted in a robust aluminium box profile. For measuring incline in different applications. The measurement area is 360°, split into four 90° zones. The vials are highly resistant to ultraviolet light and temperature fluctuations. The vials have a +30% magnification lens and the horizontal vial has a luminescent reflector. Easy battery change and automatic shut-off after 5 minutes.

- Tolerance of vials in normal/ upside down position is ±0.5 mm/m.
- Shock absorbing end protectors with anti-slip function.
- The display shows tenths of degrees, percentages, mm/m or inch/feet.
- Electronic unit tolerance in horizontal (0°) and vertical (90°) position is ±0.05°, for other angles ±0.1°.

Spirit Level IV 40 Magnet

Spirit level for installation applications. Robust aluminium profile with neodymium magnets. This along with the V-shape of the profile allows for a strong hold on pipes and other metal surfaces. Center point scale on top of the profile for quick measurement and layout in different applications.

- Tolerance in normal position is ± 0.5 mm/m, upside down ± 0.75 mm/m.
- Neodymium magnets integrated in the profile for strong magnetic force.
- The liquid in the vial is a low viscosity coloured oil mixture that gives the bubble optimal freedom of movement.
- Block Vial with additional rings for 2% inclination indication when measuring horizontally
- Double vials for both horizontal and vertical measurement.

Spirit Level ELV 40

Spirit level for electrical installations. The C-shaped aluminium profile has plastic end pieces and rubber spacers that protects and prevents the spirit level from sliding on the measuring surface. The sliding markers with graded 71mm centre spacing, allows for quick and accurate positioning when installing switch or junction boxes according to DIN 49075.

- Tolerance in normal position is ± 0.5 mm/m, upside down ± 0.75 mm/m.
- Focus vial with colour markings for easy reading and with a 200 mm radius giving a sensitivity of 10 mm/m.
- The liquid in the vial is a low viscosity coloured oil mixture that gives the bubble optimal freedom of movement.
- The anti-static properties of the liquid means that the bubble is not affected by static electricity.
- Printed millimeter grid scale on profile.

Spirit Level Cordinat

Spirit level made from a durable aluminium profile with graduations, four adjustable sliders and two tubular vials. Can be used for measuring, horizontal and vertical reading and distance marking. Ideal for applications such as hanging cupboards. Tolerance in normal position is ± 0.5 mm/m, upside down ± 0.75 mm/m.

- Transfer measured distances using the sliders.
- Position the measure distance on the wall and adjust using the vials.
- Easy centring using the zero point in the middle of the scale.
- The vials are highly resistant to ultraviolet light and fluctuations in temperature.
- The anti-static properties of the liquid means that the bubble is not affected by static electricity.

Smart distance measurer.

SIMPLE PRECISION.

With our range of distance measurers, as with all our other tools, there is strong focus on user-friendliness. They help to make work easy. Their design is compact and robust and they are very easy to use when measuring hard-to-reach spaces and at longer distances.

LASER DISTANCE METER HDL 60

Measure distance and calculate area and volume.

Wide selection.

MAKE YOUR WORK MORE EFFICIENT.

Our range of laser tools also includes both red and green laser in several different models depending on the work to be done. We also have a variety of accessories that complement and facilitate work. Laser tools are perfect to use when exact dimensions are required on larger surfaces, such as for pipe and cable routing, tiling, wall cabinet mounting or for wallpapering.

There is an app for it.

FOR EASY MEASURING AND STORING.

HDL 60 has an app for smartphones, where all dimensions can be easily stored. It is also possible to transfer dimensions for drawing up a room, to calculate surface areas on ceilings and walls and measure volume. The same app applies to our digital spirit levels, but note that HDL 100 has its own app.

Laser Distance Meter HDL 20

Intuitive and user-friendly distance measurer with a measuring range up to 20 m. High precision in compact design, making it easy to carry in pocket. A backlit display in order to increase readability in dark surroundings. Typical applications are measurement of distances, cables/pipes, calculation of surfaces for volumes or in places hard to access.

- Small and easy to use. . .
- Backlit display.
- Tolerance is +/- 2 mm.
- Measurement range 20 cm till 20 m. Perfect for usage in narrow spaces.

Laser Distance Meter HDL 60

An intuitive, precise and user-friendly distance meter. Great for measuring over longer distances, for example, cables and pipes or in places that are hard to access. The measuring range is 0.05-60 meters and it has a tolerance of 1.5 mm. Apart from simple distance measuring, you can get min. and max. values, set distances with continuous measuring, add and subtract measurements and store them. It also calculates surfaces and volumes and in cases when you can't get access you can measure lengths and heights indirectly from a distance. It has a backlit display that increases readability in dark surroundings. Also, the compact design makes it easy to bring along and, it comes with a soft protective case that you can attach to your belt.

- Protection class: IP54.
- Laser class: 2.
- 1 x 3.7 V Li-Ion battery (850 mAh), charged via included USB cable. .
- Operating temperature: 0°C to +40°C.
- Wavelength: 635 nm.

Horizontal Cross-Line Laser green

The H360G is a green cross laser that has levelling ability up to 25 metres horizontally and vertically (80m with reciever RECG). The vertical line forms a 90° angle together with the horizontal 360° laser line. The pendulum can be locked, and the fine adjustment feature enables it to be rotated horizontally and vertically for desired angles. The visibility of green laser lines is up to four times better than red laser. To be used with the included AA+ batteries. Can also be used with Li-Lion batteries (not included).

- Horizontal 360° laser line.
- Measuring tolerance 0,2 mm/m.
- Height-adjustable wall mount included.
- Compatible with the Hultafors Receiver RECG for usage up to 80 m.

Delivered in a protective case.

409170	H360G	650 g	100 mm	125 mm	100 mm	1 pcs	7 317844 091709

Compact line laser with one horizontal and two vertical 360° lines and a measuring tolerance of just 0.2 mm/m. Together with the horizontal 360° laser line, the vertical lines form a 90° angle, which form a wall cross, ceiling cross or floor cross at their intersections. The laser lines can each be switched on individually at the touch of a button. It is ideal for a wide range of tasks, such as plumbing, tiling, putting up wallpaper or setting reference markers at the floor and in the ceiling. It fits with Hultafors Universal holder and tripod for easy height adjustment.

- Projects 360° horizontal and vertical laser lines.
- Measuring tolerance is 0.2 mm/m.
- 4 x 1,5 V (AA) batteries included.
- Compatible with the Hultafors Receiver for usage up to 80 m.
- Delivered in a protective case.

Receiver

Hultafors REC and RECG are used for easier reading of laser lines at long distance or in nonoptimal light conditions. To simplify reading of laser lines at different distances the receiver can be set at two levels of sensibility; "Rough" (\pm 2.00 mm) and "Fine" (\pm 0.50 mm). The volume can be adjusted between three levels to be able to hear the signal even when used in noisy environments. The receivers are equipped with displays on both sides to simplify the reading. Two vials make sure that the receiver is positioned straight.

- Two levels of sensibility, Rough/Fine.
- Use for reading of laser lines at long distance.
- Backlit displays.
- Magnetic mounting.
- Compatible with products with PULSE-function.

THE NEXT GENERATION OF MARKERS.

Hultafors range of marking tools consists of both traditional carpenter pencils and the next generation of tools for marking. The products are developed together with professionals and are designed for making your workday more efficient, no matter what material you are dealing with.

DRY MARKER

Grip-friendly pencil in holster with built-in sharpener for clear markings.

A new classic.

SHARP PENCIL, PRECISE MARKS.

With our Dry Marker we have put extra attention to details. It combines the shape of the traditional carpenter's pencil with the classic school pencil, so you can both draw rough lines and make precision marks. The design of the holster with a built-in sharpener makes the pencil easy to sharpen. That way you always have a sharp tip close to hand.

Need a refill?

GRAPHITE OR CHALK.

The design with refill lead extend the usage of the Dry Marker and makes it last longer. Dry Marker Refill comes with 10 leads for marking on all types of surfaces. The design of the container protects the leads during transport and only ejects one lead at a time. The refill is available in 8 colour combinations. It comes in 3 variants; graphite, chalk or graphite and chalk.

Dry Marker

Grip-friendly pen in holster with built-in sharpener for clear markings. Hultafors Dry-Marker is easy to remove from its holster, so you do not have to let go of what you are working with. The shape of the holster ensures that the pen stays in place even when you move. The pen's sharpener is in the holster for easy access. Via a hole in the bottom of the holster, dirt and moisture are led away from the pen for a longer durability. Easy to change lead.

- Grip-friendly and ergonomic design.
- Roll stop on both pen and holster.
- Sharp and accessible sharpener placed in the holster.
- Optimized lead for durability and resistance to moisture.Refill is available with 10 leads in a smart container.
- Rennis available with 10 leads in a smart container.

& Buitefors ⊢s

Chalk Line CLP

Chalk line with 30 m line, metal crank and quick gear function 3:1. The house is manufactured in ABS plastic with a big opening for refilling and a cap with bayonet joint. Contains 100g of chalk. The line is braided cotton/polyester - with high absorbing chalk capacity - considerable increased numbers of distinct lines, up to 10 lines. Crank with ergonomic release button and knob. Crank can be locked in open and closed position. The cap is secured by the hook, no line hanging loose. Secure strap function.

- Overload protection reducing the risk for damaging the gear mechanism and the line to break.
- Release function in open and closed crank position. (Crank will not spin when pulling out line).
- Braided line with high absorbing chalk capacity considerable increased numbers of distinct lines.
- Gear function 3:1, rewinds the line 3 times faster.

•	The cap is divisible, makes it simple to replace the line.

Developed with pros.

THE NEXT GENERATION OF HAMMERS.

Our hammers are developed together with professional users, enabling us to deliver tools that can be relied on – by all professions. This has enabled us to develop an extensive assortment of hammers, offering claw hammers as well as special hammers, for example: carpenter's hammers, electrician's hammers and bricklayer's hammers. They have all been developed to fill one purpose – to streamline the working day without compromising the ergonomics.

reddot design award winner 2008

Ergonomic design.

DEVELOPED WITH YOUR BODY IN MIND.

Our hammers are developed with your body in mind. For us it's as important that the hammer head is causing as little vibration as possible, as it is to design an ergonomic shaft in a variety of sizes. This enables you to choose a hammer that gives you a relaxed grip and causes less strain on the body. The difference is also noticeable in the long term, as the technology reduces the risk of stress-related injuries.

A sustainable choice.

EXTEND THE LIFE SPAN OF THE HAMMER.

Several of our hammers are made with wood handles. This is not only a traditional way of making a hammer, it is also extending the life span of the product. The wooden shafts are made of hickory, a strong and flexible wood. They are available as a spare part, meaning that as long as the hammer head is in good condition you can replace the shaft when the old one is worn out, extending the life span of the hammer.

Claw Hammer TC

An ergonomically designed hammer, forged in one piece for increased durability with a vibration damping urethane plug. Thin, strong claw that affords easy access without leaving marks. The claw opening and angle give the best possible grip on the nail. Ergonomically designed handle with clear end stop and a secure grip.

- Vibration damping urethane plug.
- Right angle and shape of striking face.
- Steel shaft with I-profile for increased durability.

Thin, strong claw that affords easy access without leaving marks. In addition, the claw is rounded to prevent it tearing your trousers.

Claw Hammer TR

An ergonomically designed hammer, forged in one piece for increased durability with a vibration damping urethane plug. Thin, strong claw that affords easy access without leaving marks. The claw opening and angle give the best possible grip on the nail. Erg onomically designed handle with clear end stop and a secure grip.

- . Vibration damping urethane plug.
- Right angle and shape of striking face. Steel shaft with I-profile for increased durability.
- Thin, strong claw that affords easy access without leaving marks. In addition, the claw is rounded to prevent it tearing your trousers. The TR has a straight claw for better access and a longer shaft for more power for more demanding applications.

Sledges to rely on.

MADE TO HANDLE TOUGH CONDITIONS.

Hultafors sledge range includes sledges for wood, stone/rock and metal. Choosing the right sledge with the right head will make your work both safer and more efficient. All our sledge heads are made from high grade steel, correctly tempered in order to achieve the best possible level of strength and durability, which in turn increases user safety.

Safety first.

HOW TO USE A SLEDGE IN A SAFE WAY.

To ensure safe usage it is important that sledges are used in the right way. Most important of all is to never strike a sledge against another piece of tempered steel. If a splinter were to come off as the result of such a strike, it may have the same effect as if a bullet had been fired from a small calibre gun. To protect your vision, you should always wear protective goggles whenever you use your sledge. Also remember not to store your sledge near any heat sources as there is a risk that the wood may shrink, causing the head to loosen from the handle.

Long-lasting materials.

CHOOSE BETWEEN WOOD OR FIBREGLASS.

All Hultafors sledges are made to last. Our shafts are made from either fibreglass or wood.

The shafts made of fibreglass are ergonomically shaped and covered with rubber, offering a greater level of safety and an extended service life. The wooden shafts are made of hickory – a strong and flexible wood, and are available as a spare. That means that as long as the head is in good condition you can replace the shaft when the old one is worn out, extending the life span of the sledge.

Sledge Double-Faced KS

Sledge made from blasted and clear-lacquered ironwork, with tempered square striking faces at both ends. The shaft is 900 mm long and is made from hickory.

Made from high-grade steel, correctly tempered for the best possible level of user safety.

- The wooden shaft is available as a spare.
- NOTE! Always wear protective goggles!

The sharpest choice.

SHARP KNIVES FOR VARYING TASKS.

The most important characteristic of the knife is a sharp blade. Our complete range of snap-off knives offers excellent sharpness and precision in the cut, again and again, without interruption. In this way, the work is done efficiently without the tool taking focus from the task. The snap-off knife is the perfect choice for jobs that require extra sharpness, such as cutting into cardboard, wallpaper or carpets.

DESIGN AWARD 2020

Selection of blades.

PRECISION AND FLEXIBILITY.

In order to meet the craftsman's requirements for perfect cuts, we have produced four different blade qualities. They are adapted for different tasks without sacrificing precision, sharpness and longevity. All-round is a versatile blade with good longevity and Edge is the blade for those who want really nice cuts. If you cut a lot and want extra long life in the blade, Performance is the best choice. Non-segment is the blade that is flexible and bendable without the risk of being broken. All sections of the blade can be used on our snap-off knives, including the last one.

Slim design or rubberised grip.

All snap-off knives, except SPP 9A, are available in two different variants, compact slim design or with rubberised grip. The narrower one takes up less space in the pocket without compromising ergonomics or precision. Rubberised grips are good when more force needs to be applied to the cut, for example when cutting carpets and plasterboard. These knives also have a magazine for three extra blades. All, except SPP 9A, are available with auto lock or wheel lock function.

Snap-Off Knife SPP 9A

The SPP 9A is a robust snap-off knife for precision cuts such as intricate paper cutting or opening boxes. The slim design makes it suitable for all-round use. Tapered for better visibility, access and control. The knife is made of durable PC-plastic (polycarbonate) with a steel core for added stability. Easy to attach to a pocket using the clip which can also be used for safe blade snapping.

- Used to cut paper or open boxes.
- Auto lock function that locks the blade in fixed positions.
- Use the angled tip as a guide for measuring 45 and 90 degrees.
- Removable clip for attaching to a pocket or toolbox.
 Symmetric design for right and left-handed usage.

Orange is the new green.

MORE POPULAR, LESS PLASTIC.

We added a more sustainable option to our wide range of knives, an eco-conscious version of our popular HVK Craftman's Knife. The HVK BIO uses over 80% bio-based plastic, and 15% less plastic overall due to its innovative ribbed design. All in all, this reduces the environmental impact.

A knife for you.

UNIQUE RANGE OF KNIVES.

HEAVY-DUTY AND CHISEL KNIVES

These are powerful and durable knives that can be used for most jobs that require prizing, breaking, chiselling and hacking various different materials.

PAINTER'S KNIFE

The painter's knife is a triple-function tool. First and foremost, it is a knife, but it is also a screwdriver and a can opener.

PLUMBER'S KNIFE

As plumbers frequently need to remove burrs from pipes, the plumber's knife features an integrated file on one side of the blade.

HOLSTER

The holster is attached to a button on your trousers using a unique function that ensures that the holster doesn't come loose whilst still making it easy to remove. Insert the button into the hole, pull the holster down and snap the cover firmly in position. To remove the holster, just undo the cover.

DOUBLE HOLSTER

If you're used to carrying two knives at the same time, you may benefit from using a double holster. It allows you to easily carry the knife set-up that best suits your requirements.

Craftsman's Knife HVK BIO

A more sustainable option to our popular craftman's knife. The handle is produced in bio-based plastic and with a unique design we have also managed to save material in the handle. All in all, this reduces the environmental impact. The handle has a hole for a strap, to enable you to secure the knife when working at heights. The blade is made from 2.5 mm carbon steel that has been hardened to 58-60 HRC. The knife is also available with a paper sleeve to enable reuse of your existing holster and to reduce the climate footprint even more. HVK BIO has the same strength and durability as the rest of our craftsman's knives.

- Material saving in the handle to reduce environmental impact.
- The handle is made from extra durable bio-based HDPE-plastic.
- Hole in handle for tool securing.
- HVK BIO PH is delivered with a paper sleeve instead of holster. The cutting edge is sharpened in several stages, with a final honing on a leather strop.

The grinded spine of the blade is designed for starting a fire with a fire starter.

- The cutting edge has a scandi grind for superior sharpness and is easy to resharpen. A protective electrophoretic deposition coating (EPD) for best rust protection.
- The handle is made from super-durable PP plastic and fitted with a Santoprene friction grip. A long tang makes the knife very durable.
 The textile belt loop allows up to 80 mm wide belts and is equipped with a pocket for a fire starter. It is also detachable if you want to attach the holster to the button on your work clothes.
- Grinded spine for use of a fire starter and the scale engraved on blade is optimized for outdoor usage

Or

Fire Steel FS

A long and extra thick fire steel for better function and ergonomics resulting in better efficiency. 100 mm in length and a diameter of 10 mm for a fire steel easy to use in any weather. The sparks generated reach approximately 3000°C. To be used against the spine of Hultafors Outdoor Knives (OK1 and OK4), whose holsters come with fire steel holders.

- The fire steel is easy to hold and the strap provides extra grip. • The elastic strap makes it easy to secure in the Hultafors fire steel holder. Almost impossible to wear out. Good for thousands of strikes. •
- •
- Both ends of the fire steel can be struck - more sparks for the money.

Advanced knives.

STRONG AND DURABLE.

A really good knife should fit perfectly in your hand and be easy to use. At the same time, it should be safe, reliable and have all the important functions. To make our utility knives as user-friendly as possible, we have eliminated all unnecessary components and minimised the number of moving parts. This not only extends the service life of the knife, as there are fewer parts that can break, it also makes it easier to keep the knives clean.

needed.

grip and precision when cutting plasterboards, carpets and wallpaper.

a natural finger grip.

Specialised blades.

BLADES WITH A PURPOSE.

We offer a wide range of blades engineered for specific purposes. We offer six specialized blades; the sharp Allround blade, a reliable choice for everyday cutting. The Performance blade adding extra long-life. Edge, bringing extra sharpness. Hook is perfect for floor layers cutting carpets or for cutting roofing felt. Safety comes with a blunt tip. Finally the Stamina blade, made from a secret bi-metal composition designed to push the limits when it comes to sharpness and long service life - an optimal combination of performance and minimizing the carbon footprint.

Changing the blade.

STORING BOTH NEW AND WORN OUT BLADES.

On the inside of the handle on our utility knives we have placed a practical spring-loaded dispenser that holds five to ten spare blades. The dispenser can also store worn-out blades so you never have to think about where to place them. The blades can be changed quickly and easily with no extra tools needed.

Utility Knife URA

Light and efficient utility knife with a great grip, ergonomically designed for best possible safety, comfort and control. A practical screw wheel allows for easy change of blades with no tool needed. Comes with 10 allround blades in a practical dispenser stored inside the knife.

- Ergonomic, angled design with a natural finger grip and a tapered point for an excellent grip when cutting plasterboards.
- Casing in aluminium and friction grip with screw wheel for opening the knife with no tool required.
- Inside the handle a practical springloaded dispenser holds ten spare blades.
- Few moving parts and fixation using magnets facilitates cleaning and change of blades.

Double holsters.

QUICK ACCESS TO YOUR FAVOURITES.

By wearing the holster close to hand, the safety-conscious craftsman always has quick access to the knives he or she uses the most, and can thereby work both efficiently and safely. Our double holsters are available in different combinations, depending on the task. The holster is made from impact-resistant PP plastic, joined by rivets and an elastic loop. Once your knives have worn out, keep the holster and use it again with new knives – a great way to minimise the carbon footprint.

DOUBLE HOLSTER JS & URA

Elastic loop.

Joined by rivets.

The ergonomically-designed utility knife URA offers a great grip when cutting plasterboard, carpets and wallpaper.

> Made from impactresistant PP plastic.

Once your knives are worn out, keep the holster and use it again for new knives.

Find your favourites.

The jab saw with its graded scale on the blade is mainly designed to cut

plasterboard.

MANY COMBINATIONS.

Our double holsters come in different combinations, all with a purpose. Besides JS & URA we have combinations specially developed for electric work, precision work, tougher tasks and cutting.

Double Holster JS & URA

Award-winning chisels.

SHARP, RELIABLE AND ALWAYS ON HAND.

Our range of chisels offer just what professional craftsmen actually need. The award-winning HDC is unique with its uniform steel construction, forged in one piece. The robust design gives the chisel extreme durability, outstanding strength and impact resistance.

reddot award 2015 winner

One with the surface.

MINIMUM IMPACT TO THE FOUNDATION.

The HDC can be laid flat against the surface, allowing you, for example, to prise away tiles without damaging the foundation below. In other words, a really sharp chisel for those who require extra everything when it comes to strength, function and accuracy.

Chisel HDC

Chisels for tasks that require strength and precision. Forged in one piece with continuous robust I-profile for extreme breaking strength and to maximize the power transmission down into the workpiece. Impact resistant nylon striker that can be replaced when worn down. 25° cutting edge for an optimal ratio between sharpness and durability. The entire blade, including the handle, can be placed flat against the surface which allows you to cut parallel to a flat surface.

- Forged in one piece with continuous I-profile.
- Flat underside for parallel cuts.
- Handle made of grip-friendly Santoprene. •
- Replaceable nylon striking cap available as spare part.
- Practical holster that fits both in a belt or on a button.

Demolish with quality.

WIDE RANGE OF WRECKING BARS.

When working on ripping out windows or room furnishings, it is important that you choose a tool that is as easy to handle as possible. In such instances, a wrecking bar is exactly what you need. We produce a range of different bars, including levers, crowbars/wrecking bars and pry bars, in several different designs and materials. You will always be able to find one that satisfies your requirements.

WRECKING BAR STEEL ADJUSTABLE 209 SB

Steel or aluminium.

WILL OF STEEL OR FLEXIBLE AS ALUMINIUM.

Steel is almost three times as heavy as aluminium, but it is also three times as strong. When doing work where weight and power is critical to achieving a good result, steel is the obvious choice. Aluminium is easier to work with and gentler on the materials you work with. It doesn't rust, is more resistant to cold and is much more flexible. An aluminium tool can be "bent" about three times as much as a steel tool without being deformed making it ideal for fitting and adjusting within the engineering industry.

Ergonomical tips.

BE KIND TO YOUR BODY.

To help you steer clear of any injuries, we've come up with a few tips. Always work with a straight back, but try to avoid working with straight arms. You should also avoid working with bent wrists. The best thing to do is to try and change your work posture as often as you can. Also try to avoid getting into too many situations that involve jerking and wrenching. It's also good to know that aluminium is considerably gentler on your body, particularly when working at shoulder height or above.

Wrecking Bar Steel Adjustable 209 SB

Wrecking bar manufactured in high quality steel with ergonomic rubber-clad handle. Articulated claw, adjustable to nine different positions. Wide, ground contact surfaces and thin ends make it easy to use and reduce the risk of leaving marks. The claw is optimised for pulling out nails. The curved section at the chisel makes space for the hand and minimizes the risk of crushing damage.

- Adjustable claw in nine steps for best working position.
- · Wide, ground contact surfaces and thin ends make it easy to use in narrow spaces and reduce the risk of leaving marks.
- Optimised claw for pulling out nails.
- Secure strap function.

Pry Bar Aluminium, Demolition

A demolition bar with a hollow handle made of specially alloyed aluminium making it light weight and strong at the same time. The low weight compared to steel pry bars and burke bars makes it more gentle on the body, which is especially important when working above shoulder height. The claw, made from hardened boron steel – is broad and robust but still thin for the best possible access. The curvature of the claw and the heel allow you to work at a comfortable position and you don't have to pry with the handle pushed all the way down to the ground.

- Wide claw with nail puller, in hardened, high-alloy boron steel.
- Handle made from extremely strong aerospace-grade aluminium.
- Aluminium does not rust and withstands cold temperatures better.
- The claw and heal is optimised for ergonomic and efficient work.

Art.no.	Model	Length	Weight	Material	Qty/pack	EAN
841054	A 1500 SK	1500 mm	3400 g	Aluminium, Steel	1 pcs	7 391408 410540

Pry Bar Aluminium, with Steel Point

An aluminium pry bar that also can endure breaking work. The steel point makes it able to withstand high breaking loads.

- Manufactured in "Aerospace aluminium" for high strength and less flexing.
- Aluminium pry bars are lighter and easier to work with, especially when working at shoulder height.
- An aluminium tool does not rust, and has better resistance to cold temperatures
- It can be bent about three times as much as a steel tool without being deformed.
- The tip is made of hardened, high-alloy boron steel and will therefore last for a long time.

Precision in every cut.

A GOOD SAW IS ALL ABOUT EFFICIENCY.

Hultafors offers a complete range of handsaws for any type of challenge and all types of job. Our saws come in different designs; handsaws, bow saws, hack saws and various special saws for cutting most materials, including wood, metal, concrete, and plasterboards. The common denominator for all our saws is precision and control, as we know professional craftsmen expect a great deal from their saws.

HANDSAW HBX

Choose the right saw.

WHAT IS YOUR CHALLENGE?

HANDSAW

Our handsaws ensure you will get the job done and are a reliable choice for all-round cutting as well as precision work. Our different models are customised depending on how frequently they are used and for what tasks. They are all made in durable material and with the professional user's efficiency in mind.

BOW SAW

Our range of bow saws includes saws for cutting outdoors as well as on construction sites. The smaller bow saw can also be used with hack saw blades. What they all have in common is the ergonomic design with knuckle protection and efficient blade.

HACK SAW

Our hack saws are the perfect choice when you need to do precision work. All our hack saws come in handy sizes, from pocket size up to 12 inch. Thanks to high blade tension they all deliver precision cuts, never compromising with efficiency.

SPECIAL SAWS

Our range of special saws include saws for smaller jobs, like the jab saw and pull saw, as well as for the really tough tasks, such as cutting stone-based material.

Handsaw HBX

Handsaw developed for the modern craftsmen in close cooperation with professional users. Hultafors unique teeth's with 3-phase grinding combines efficiency and a good bite with nice straight cuts without chipping. The 1 mm thick steel blade with a unique eco-friendly wax coating gives less friction and power-consuming side vibrations. The durable three-component handle has a comfortable ergonomic grip and 45° and 90° angle guide. The handle is mounted to the blade with a stable safety screw which enables changing blade in a simple and reliable way. The narrow blade tip facilitates access in narrow spaces and when to start cutting in the middle of a board.

- Unique teeth's with 3-phase grinding combines efficiency and a long life time.
- Environmentally-friendly wax-based powder coating gives rust protection, less friction and power-consuming side vibrations.
 Reliable, easy and secure system for changing the blade.
- Ergonomic and durable ABS handle.
- A unique and durable blade protection with quick release function.

Hacksaw HMX

A professional hacksaw with a stiff & compact cast aluminium frame for low weight, maximum performance and very high blade tension. The handle is ergonomically shaped with a rubber grip for both hands to maximize the user friendliness. The blade can be tilted for cutting close to a flat surface without loss of performance and precision. The blade tensioner is spring-loaded to support when changing blades and the ergonomically shape helps when creating the very high blade tension. The hacksaw is delivered with Hultafors BI-metal blade (24 TPI) for maximum precision and performance.

- Compact cast aluminium frame.
- Very high blade tension.
- Ergonomic handle with rubber grip.Spring-loaded blade tensioner.

Hacksaw HMS

A standard hacksaw with a steel frame for precision, performance and high blade tension. The Ergonomically shaped handle is made from cast aluminium and complemented with a grip friendly plastic support at the front of the frame to maximize the user friendliness. The blade can be tilted for cutting close to a flat surface without loss of performance and precision. The blade tensioner is spring-loaded to support when changing blades and the ergonomically shape helps when creating the high blade tension. The hacksaw is delivered with Hultafors BI-metal blade (24 TPI) for maximum precision and performance.

- Steel frame.
- Very high blade tension.
- Ergonomic handle with aluminium grip.
- Spring-loaded blade tensioner.

Bow Saw BSL

Professional bowsaw with an ergonomic handle and knuckle protection to provide a safe and efficient usage. The handle made from PP and rubber provides a very good grip in all different conditions (dry or wet). The metal frame is made in high quality steel with a robust paint to protect from rust. The saw is developed for high durability in order to be used both in the nature and on construction sites. The sawblade is made from high quality steel, C75 and the teeth are hardened and shall not be sharpened with a file. The saw is equipped with a multipurpose saw blade for best performance in both dry and fresh wood. The saw has a more triangular shaped frame in order to provide an improved access in narrow spaces.

- Handle in PP and rubber.
- Sawblade in C75-steel.
- Hardened teeth.
- Triangular designed for optimal access in narrow spaces.

Pull Saw

A traditional Ryoba saw with a wooden handle for the authentic feeling. The saw has a 0.5 mm thick blade made from SK5 steel manufactured in Japan. The thin blade provides high flexibility and precision for perfect cuts when making furniture's etc. The blade on a Ryoba has two different grindings in order to perform both when cutting along and across the fibers in the wood, Rip-cut & Cross-cut. The grinding for pulling the saw makes it possible to create precision cuts with a very thin blade together with a minimal force. The teeth is hardened for maximum life span and sharpness. The blade is antirust treated, do not forget to clean the blade and protect it with some oil to maintain the protection over time.

- 0.5 mm thin blade in SK5-steel.
 - 2 different grindings Rip + Cross cut. Hardened teeth.
 - Hardened teeth.
 Anti-rust treated blade.
 - Traditional wooden handle.

It's in the handle.

ERGONOMIC GRIP AND COLOUR-CODED.

Our screwdrivers are designed to ensure an optimal grip for precision work and maximal transmission of power. The high-quality steel blades are hardened according to ISO standards. To make it easy finding the right screwdriver we have colour-coded the handles for each model: Slotted, Phillips, Torx and Pozidriv. The full range includes the four standard tips, VDE screwdrivers together with stubbies, bit screwdrivers, hexagon ballpoint screwdrivers, hexagon nut drivers and magnetic bit holders.

Design that will last.

TYPE MARKING THAT WON'T FADE.

We always design in close collaboration with professionals and together we discovered two areas for improvement, ergonomics and type marking. So, we set out to design the perfect handle for any type of job. We put an imprinted marking on the top of the handle that won't fade and colourcoded each model to make it easy finding the right one.

Slotted Screwdriver

Slotted screwdriver for professional use, developed together with craftsmen. Ergonomic design for optimal comfort. The long rubber-coated handle ensures grip for precision and maximal transmission of power. The handle is made from durable PPC plastic with a coating of age-resistant and easy-to-grip rubber. The permanent marking of type and size on the top as well as the handle's colour make it easy for the user to select the right screwdriver. The blade is manufactured from high-quality hardened steel for long life. The screwdriver's handle has a hole for hanging or securing. The handle's design prevents the screwdriver from rolling on inclined surfaces.

Colour-coded handle with clear marking of the model and point size.

- Designed for power and precision.
- Ergonomic rubberised handle for a secure grip.
- Handle with roll stop and hole for hanging.

VDE Slotted Screwdriver

Slotted screwdriver with insulated blade for working on electrical installations up to 1,000 V. Developed for professional use together with craftsmen. Each screwdriver is tested and certified according to IEC 60900. Size 3.5-5.5 has an extra narrow blade for better access in confined spaces. Ergonomic design for optimal comfort. The long rubber-coated handle ensures grip for precision and maximal transmission of power. The handle is made from durable PPC plastic with a coating of age-resistant and easy-to-grip rubber. The permanent marking on the top of the handle make it easy for the user to select the right screwdriver. High-quality hardened steel blade for long life. The screwdriver's handle has a hole for hanging or securing. The design of the handle also prevents the screwdriver from rolling off an inclined surface.

- Handle with clear marking of the model and point size.
- Designed for power and precision.
- Ergonomic rubberised handle for a secure grip.
- Handle with roll stop and hole for hanging.
- Certified according to IEC 60900.

Compact power.

ERGONOMIC AND EASY TO USE.

Professional craftsmen know what a difference it makes to really be able to trust their tools. This is especially the case for clamps, which are often used to hold or stabilise a work project quickly. Hultafors' clamps are ergonomic, durable and easy to use – ensuring a long-lasting reliable clamping force.

QUICK CLAMP QCX

Compact and user-friendly quick clamp with a one-hand grip.

Two types of clamps.

FOR RELIABLE SUPPORT WHEN NEEDED.

QUICK CLAMPS

Quick and handy or extreme clamping force? If you ask professional craftsmen about quick clamps, they usually answer that the clamps must be quick to put into place and have enough clamping force to do the job well. That is why we have prioritised a neat, compact and ergonomic design using durable materials. This ensures that Hultafors' Quick Clamps and Ratchet Clamps are easy to use and effective with enough clamping force to work securely.

SCREW CLAMPS

Sturdy, neat and good grip for easy use with substantial clamping force. Hultafors' screw clamps have been developed to simplify the work of professional craftsmen. The CFP screw clamp with its chrome coated die-cast rail has a pivoting handle to provide greater force when tightening and loosening.

Quick Clamp QCX

Compact and user-friendly quick clamp with a one-hand grip, a clamping force of up to 120 kg and a throat depth 20 mm wider than the QC model. Steel rail forged in one piece, with a slim front jaw for increased access in narrow spaces. Pressure plates with tracked rubber pads to protect the surface and provide an increased clamping force. Hardened rod and bricks for durable and high performance. Reversible head enabling both internal and external attachment. Housing made of fiberglass-reinforced nylon.

- Slim front jaw for increased access in narrow spaces.
- Quick and easy clamping operations.
- Reversible head enabling both internal and external attachment.
- Clamping force of up to 120 kg.
- End protection with a hole for hanging.

A smarter way to carry.

FOR AN EASIER WORKDAY.

The classic toolbox is often left behind in the craftsman's van or trailer. Instead many craftsmen put the few tools they expect to use in a regular bucket – a simple and practical solution yet with many limitations, not least when it comes to ergonomics. Hultafors Tool Bucket is as simple as it is clever. With its smart details, ergonomic shape and comfortable handle you get a tool carrier that saves both your body and your wallet. For an easier workday and a professional appearance.

Ergonomical design.

SAVING YOUR BODY.

The rear side of the tool bucket is shaped in order to improve the ergonomics when carrying it. The back is rounded so you can carry it close to the body without bouncing against it on every step. The handle is comfortable and could be placed in an upright position in order to simplify the next lift of the tool bucket. As a bonus the tool bucket is stackable and equipped with a measuring scale on the inside.

Tool Bucket

Ergonomic tool bucket made of robust PP-plastic material for versatile use such as carrying tools or necessities. The rear side is shaped in order to improve the ergonomics when carrying the product. The handle is comfortable and could be placed in an upright position in order to simplify the next lift of the tool bucket. The tool bucket is stackable and equipped with a measuring scale on the inside.

Robust handle for comfortable carrying. Handle can be put in standing position when put down.

- Holes for attaching a shoulder strap.
- Measuring scale on the inside.
- Can take a burden of 100 kilograms.
- Made of durable PP-plastic.

AXES

Forged with tradition.

HULTS BRUK CELEBRATES 325 YEARS.

2022 is the year when we mark 325 years for Hults Bruk. Our axes are appreciated all around the world and used both for traditional woodwork as well as for outdoor activities by enthusiasts. What the axes have in common is their history. Hultafors axes have been crafted in the traditional way since 1697, being hand forged at Hults Bruk in Östergötland, Sweden. This handcraft in combination with the forging art results in a reliable high density product with a long service life that can be used for several generations. That is why we provide a lifetime warranty for all our Premium axes.

STÅLBERG CARPENTER AXE

Made from carefully selected American hickory and treated with linseed oil.

A notch near the shaft allows you to hold a hand directly above the edge while cutting. Named after one of the most experienced smiths at Hults Bruk; Ernst Ståhlberg.

As long as the head is in good condition you can re-use your tool by fitting a new shaft when the old one is worn out.

Made from Swedish recycled CO₂ neutral steel

Each head is unique as all our axes are forged by hand.

Scandinavian grind. Razor sharp ready to use.

Welcome to the outdoors.

BRINGING HISTORY INTO THE FUTURE.

At Hults Bruk in Östergötland, Sweden, there are smiths who carry out work that not many others are able to do. In fact, there are very few producers in the world employing smiths with the skills this craft requires. With our Premium range we are bringing over 300 years of craftsmanship into the future. To celebrate our history, the products have been named after a famous blacksmith or a local area around the forge.

Lifetime warranty.

FOR ALL OUR PREMIUM AXES.

We have a long tradition of axe manufacturing. In fact our craft has been practiced for over 300 years and the headforging process has been refined for as many years. That is why we include a lifetime warranty with each Premium axe head. The certificate has to be registered online and is valid during 50 years, from the date of purchase.

Stålberg Carpenter Axe

With its straight handle and long, narrow and straight edge, our carpenter axe provides you with the precision any skilled craftsman demands. The finger notch in the axe head allows a grip where your hand is placed, almost straight above the center of the cutting edge, for increased precision. The axe is hand forged and made from Swedish recycled CO₂ neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. This axe is named after one of Hults Bruk's most experienced blacksmiths from the first half of the 20th century, Ernst Stålberg. Take care of your axe and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

- Wooden handle from American hickory, treated with linseed oil.
- Straighter egde with Scandinavian grind.
- The edge is sharpened, polished and ready to use.
- Leather axe sheath included.

Hultån Hatchet

Our classic trekking hatchet is the perfect outdoor companion, wether you are hiking in the wild or just need to work on the camp fire. The hatchet comes in handy for almost any task in the forest, but first and foremost for camp site work, such as collecting and processing fire wood and building shelter. Because of its versatility and light weight, Hultån has become a best seller. The hatchet is hand forged and made from Swedish recycled CO_2 neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. The hatchet is named after Hultån, the stream where the water for the water wheels was once taken. Take care of your hatchet and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

- Wooden handle from American hickory, treated with linseed oil.
- Scandinavian grind.
- The edge is sharpened, polished and ready to use.
 Leather axe sheath included.

Ågelsjön Mini Hatchet

This is our smallest hatchet, suitable for hiking in the mountains or in the woods. The hatchet is flexible and easy to use, and it fits perfectly for diverse tasks near the camp site, such as processing fire wood and shelter building. With its short handle and light weight, it is easy to pack in your back pack or attach to your belt. This hatchet has become a favourite among those who enjoy spending time around the camp fire. The hatchet is hand forged and made from Swedish recycled CO_2 neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. The axe is named after the nearby lake Ågelsjön, where the water needed to run the waterwheel for the forge was once taken. Take care of your hatchet and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

- Wooden handle from American hickory, treated with linseed oil.

Ekelund Hunting Axe

With its ground neck and medium-weight head, our classic hunting is ideal for easier forestry work as well as for skinning game with great precision. This makes it your perfect hunting partner. It is also an ideal gift for any hunting enthusiast. The axe is hand forged and made from Swedish recycled CO_2 neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. The name of this axe comes from Gunnar Ekelund, the squire who initiated axe production at a larger scale in Hults Bruk in 1870 - 1875. Take care of your axe and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

- Wooden handle from American hickory, treated with linseed oil.

Wetterhall Throwing Axe

This kind of double bit axe was originally used by lumberjacks, who benefitted from the possibility of always having a sharp axe around. While using one edge for rough work, they could be more careful with the other. Today it is primarly employed in throwing competitions among enthusiasts. The axe is hand forged and made from Swedish recycled CO_2 neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. This axe has been named after Bo Wetterhall, the man who served longer than anyone at Hults Bruk. Take care of your axe and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

- Wooden handle from American hickory, treated with linseed oil.
- The edge is sharpened, polished and ready to use.
- Leather axe sheath included.

This is a solid splitting axe, intended for heavier duties such as splitting logs and wood. The shape of the head, in combination slightly convex grinding, splits the wood. The axe has a long and straight handle made from American hickory, to gain maximal speed and controll when splitting logs. The axe is hand forged and made from Swedish recycled CO_2 neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. The name of this axe has its origin in Hult, the area where Hults Bruk was founded. Like most old Swedish geographical names, it describes the surrounding landscape of the place. Take care of your axe and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

- Wooden handle from American hickory, treated with linseed oil.
- Slightly convex grinding.
- The edge is sharpened, polished and ready to use.

Åby Forest Axe

Our forest axe is a beautiful hybrid with many types of use. Aby has a straigther edge and grinding, and a good finger notch below the head for increased precision. The long, thin ergonomic handle minimizes the weight, at the same time giving you great force when striking. This axe is perfect for shelter building, processing firewood, and carving as well as precision work. In short, it is your perfect forest companion. The axe is hand forged and made from Swedish recycled CO_2 neutral quality steel in the forge at Hults Bruk. The forging tradition goes as far back as 1697. This axe is named after Åby, the nearest village to Hults Bruk, where many of the workers lived in the middle of the 20th century. Take care of your axe and it will stay a faithful companion for many years to come. Thanks to the quality and craftsmanship of this axe, we offer you a full lifetime warranty on the axe head.

Large felling axe designed for competition and serious chopping. The design of the head is inspired by Australian Racing Pattern Axes, polished and heavy with a convex grind edge. The long and curved handle in American hickory provides maximum speed and force when felling trees. The axe is hand forged and made from Swedish recycled CO₂ neutral quality steel in the forge at Hults Bruk. Our forging tradition goes as far back as 1697, and the steel head is struck over 60 times to increase density and durability to the head. Take care of your axe and it will stay a faithful companion for many years to come.

- The edge needs to be fine sharpened before use.
- · Wooden handle from American hickory, treated with linseed oil.

Put your company in focus.

Hultafors can offer advertising print on a number of different products. On folding rules, the advertising print can be placed on the section and/ or the side. Note that the printed surface may differ from model to model. Folding rules with advertising print are supplied as standard in packs of 10 (plastic foil) without an EAN code on the folding rule.

COLOURS

- Hultafors can offer printing in the following standard colours as per the Pantone scale "Solid Coated", HKS and RAL.
- Photo print in CMYK.
- Note that minor colour variations may occur.

PRINT AREA

- The print area is suitable for logotypes, company names, texts and photo prints in 4 colour CMYK.
- Photo print can be ordered on all folding rules.

EXPLANATIONS PRINT AREA, FOLDING RULES

RE = Print side. The folding rule has a standard scale on the end sections, which only allows for a print area on the side (section printing not available). The print area is suitable for logos, company names or other texts and images.

FÖ = UPPER FIELD SECTION PRINT + PRINT SIDE.

The upper half of both end sections of the rule are available as a print area. Company name, telephone number, e-mail address or short slogans can be placed here. Can be combined with print along the side of the rule.

MF = MIDDLE FIELD SECTION PRINT + PRINT SIDE. Comparable with FÖ (upper field), but the print area is located in the centre of the end sections for unhindered use of the scale on both sides of the rule. Can be combined with print along the side of the rule.

PROOFING

- Image / photo in the form of logotype or other vectorised image must be enclosed with the proof order as an open EPS file or PDF file.
- Resolution should be greater than 300 dpi for images and photos.
- Hultafors will be happy to provide information on technology, software and equipment. The file must also include information on colours.
- Attached photographs must be in JPG, TIF or PNG format.
- For incomplete files, an additional charge will be made to make the file printable.
- A proof consists of one or more blocks that are numbered. These blocks can be used for subsequent proofing, for example if a block is to be replaced but the others are to remain.
- A block can be used for a subsequent proof order if the product is the same.

Folding Rule 59 – 2 meter

The classic Hultafors wooden folding ruler with metric graduation on both sides. Can be printed on both the side and along the first section of the scale.

A unique product family

HULTAFORS **GROUP** offers a dynamic range of premium brands to rely on – for distributors and craftsmen alike. Each brand within the Group is united with a common passion: to keep craftsmen at the forefront in terms of functionality, safety, protection and overall productivity.

Hultafors Groups is proud to present sixteen leading brands that together offer a unique product family for professional craftsmen.

Each brand represents expertise in its particular area and brings unparalleled knowledge and insight into the unique on-the-job challenges encountered by craftsmen. This makes it possible for us to meet, even anticipate, evolving demands by designing innovative state of-the-art products that make the craftsmen's workday safer, easier and more productive.

Excelling in brand-driven product categories within the industry and construction equipment sectors, we offer customers and users a best-in-class experience. And by using our high-value products as well as benefitting from brands built around their needs, craftsmen can be at the forefront every day and take great pride in their work.
